OUR STANDARD.

The satisfactory reception the products of our laboratory have met with, and the demand made upon us by druggists and physicians in various States, have induced us to add to our Catalogue a *select list* of fluid extracts. Those which are officinal in the U. S. Pharmacopeia, are prepared in exact and careful accordance with that authority. All others, with one exception, Cherry Bark, (U. S. P. 1860), contain the virtues and therapeutic properties of one Troy ounce of the specific drug in each fluid ounce of the extract. We believe that the quality of the crude materials we use, the care bestowed upon the process employed, the uniformity in strength, and the neatness of our packages, will commend these extracts to a wide circle of pharmacists and physicians.
